

Technical drawing of a rectangular frame structure. The drawing shows a top-down view of the frame with dimensions and section lines.

Dimensions:

- Overall Width:** 410
- Overall Height:** 310
- Inner Width:** 405
- Inner Height:** 295
- Section Line A-A':** Indicated by a horizontal line with arrows pointing to the left and right sides of the frame.
- Section Line B-B':** Indicated by a vertical line with arrows pointing to the top and bottom of the frame.

Structural Details:

- The frame consists of a rectangular outer boundary and an inner rectangular boundary, connected by vertical and horizontal members.
- The vertical members are labeled with dimensions: 38, 33, 33, 33, 38.
- The horizontal members are labeled with dimensions: 43, 38, 38, 38, 38, 43.
- The corners of the frame are reinforced with square blocks, likely representing corner braces or fasteners.

The technical drawing illustrates a reinforced concrete frame structure with the following dimensions and features:

- Overall Dimensions:** The total height of the structure is 250 units, and the total width is 180 units.
- Column Dimensions:** Each column has a width of 20 units. The clear height between the base and the beam is 235 units.
- Beam Dimensions:** The beam has a depth of 70 units. The distance from the left face of the first column to the centerline of the beam is 170 units.
- Reinforcement Details:**
 - Detail 1:** A circular callout labeled "Detail 1" points to the joint between the column and the beam, showing the arrangement of longitudinal bars and stirrups.
 - Base Reinforcement:** The bottom section of each column shows a cross-section with longitudinal bars and a hatched area representing a specific material or construction layer.
- Other Features:** Small rectangular protrusions are shown along the top edge of the beam at regular intervals.

Technical drawing of a rectangular frame structure. The drawing shows a central rectangular frame with a horizontal top bar and two vertical side bars. The dimensions are as follows:

- Overall width: 410
- Overall height: 280
- Inner width: 190
- Inner height: 270
- Top bar thickness: 10
- Side bar thickness: 10
- Material specifications (top bar): 2.5, 38, 5, 33, 5, 33, 5, 33, 5, 38, 5, 38, 5, 33, 5, 33, 5, 38, 5, 2.5
- Material specifications (side bars): 2.5, 38, 5, 33, 5, 33, 5, 33, 5, 38, 5, 38, 5, 33, 5, 33, 5, 38, 5, 2.5

Technical drawing of a structural frame (Fig. 1.10). The drawing shows a frame with two vertical columns and a horizontal beam. The left column has a total height of 275, with a section of 30 at the bottom, a section of 70 in the middle, and a section of 21 at the top. The right column has a total height of 230, with a section of 21 at the top. The horizontal beam has a height of 10. A detail callout labeled 'Detal 4' points to the top of the left column. The drawing includes various dimension lines and section markers.

Technical drawing of a circular mechanical part, showing a cross-section. The part has a total diameter of 100. A central vertical section has a width of 40 and a height of 100. A horizontal section at the top has a width of 100 and a thickness of 2. There are three vertical slots in the horizontal section, each 100 wide and 2 thick. The drawing is a cross-section, indicated by hatching.
